

Merve Yıldırım received her M.Sc. degree in Electrical and Electronics Engineering from Firat University, Elazığ, Türkiye in 2015. She received her Ph.D. degree in Electrical and Electronics Engineering, specializing in Electrical Machines, from Firat University in 2022. Since 2024, she has been working as an Assistant Professor in the Department of Electrical and Electronics Engineering, Electrical Machines Division, at Firat University. Her research interests include electrical machines and drives, electric motor design, electric vehicles, safe driving, and renewable and hydrogen-based energy systems. Her current research focuses on the design, modeling, control, and performance analysis of electric motor drive systems and energy systems for electric and hybrid vehicle applications.
