

MEHMET FATİH SAYILIR

EUROPOWER WORLD-Deputy General Manager

Feb 2025 – Present

Contributes to the strategic leadership and operational management of power transformer engineering and manufacturing, driving technical excellence, production efficiency, and continuous improvement. Oversees cross functional coordination across engineering, manufacturing, and technical development, supporting innovative solutions, product quality, and sustainable business growth in the energy sector.

Arteche-R&D Manager

Nov 2022 – Feb 2025

Led research and development initiatives in high voltage instrument transformer technologies, focusing on advanced product design, engineering innovation, and technology advancement. Supported the development and continuous improvement of technical solutions, collaborating across engineering disciplines to enhance product performance, reliability, quality, and alignment with evolving industry requirements.

EMEK Electric-Technical & Management Roles

Jun 2012 – Nov 2022

Progressed through key technical and leadership positions, from Technical Product Development Project Lead to Director of the High Voltage Test Laboratory and Quality Management Systems. Led product development initiatives, coordinated high voltage testing activities and managed quality systems to support product validation, technical compliance, and operational reliability. Built extensive expertise in engineering project execution, testing processes, quality assurance, and cross functional technical leadership.

EDUCATION | Middle East Technical University (METU)

Bachelor's Degree in Electrical and Electronics Engineering.
